EDUCATION	PRESIDENT UNIVERSITY , Candidate for <i>Sarjana Komputer (S.Kom.)</i> . GPA 3.21 / 4.00, Sep 2024 - Present Honors: Jababeka Scholarship Activities: Hacksphere	Aug 2024 - Present Oct 2025
WORK EXPERIENCE	Kementerian PANRB , Jakarta, DKI Jakarta Software Engineer Intern , Government Digital Transformation Division Supporting the development and enhancement of internal web-based applications for Government Digital Transformation initiatives at Kementerian PANRB. Responsibilities include assisting in frontend and backend development, database design, RESTful API integration, application testing, debugging, system maintenance, and continuous improvement of digital government evaluation and monitoring systems.	Jul 2026 - Present.
	FounderIQ , Remote Founder & Full-Stack Developer , Startup Project (Self-initiated) Founded and solo-built an AI co-founder platform (Next.js 15, TypeScript, Claude AI) shipping 4 streaming-AI tools: idea validation with a 0-100 VC score, business model canvas, pitch crafting, and market intel. Owned product, engineering, and Vercel deployment end-to-end.	Jun 2026 - Present.
	Freelance - Independent IT Projects , Remote Freelance Software Developer , Web, Mobile & AI Development Deliver custom software on a project basis across 3 stacks: web (React, Next.js), cross-platform mobile (Flutter, Kotlin), and AI/Python integrations. Own requirements, development, and delivery end-to-end, shipping production builds under tight deadlines.	Jan 2025 - Present.
	Kindness Community for Knowledge , Cikarang, Bekasi Regency Supported event operations by assisting with preparation, participant coordination, registration, and documentation. Worked together with the committee team to ensure the activity ran smoothly and helped manage tasks before, during, and after the event. , IT Support Division Assisted in digital and technical support activities, including documentation, data organization, and basic troubleshooting during events or community programs. Helped improve workflow efficiency by supporting the team with technical and administrative tasks.	Oct 2024 - Present.
PROJECTS	PestGuard AI , AI & Backend Developer Built a real-time warehouse bio-hazard detection system with a custom-trained YOLO11 model, delivering sub-1-second WebSocket alerts plus CLAHE low-light enhancement, a Gemini-powered RAG assistant, and Telegram/audio alarms. Selected project for the AI Open Innovation Challenge 2026 (Kawan Lama Group).	Apr 2026 - Jun 2026
	OBSDIAN - Crypto Trading Terminal , Full-Stack Developer Built an enterprise-grade crypto trading terminal in full-stack TypeScript: live Binance data over WebSocket, 7 technical indicators computed server-side, a tested average-cost P&L paper-trading engine, and real-time alerts, all behind session auth with RBAC and an append-only audit log. No mock data.	Jun 2026 - Present.
	FounderIQ - AI Co-Founder Platform , Full-Stack Developer Founded and solo-built an AI co-founder platform (Next.js 15, TypeScript, Claude AI) shipping 4 tools: a 0-100 VC idea score, business model canvas generator, pitch crafter, and market intel, with real-time streaming AI plus local history and export.	Jun 2026 - Jun 2026
	SRMAudit - OCTAVE Allegro GRC Platform , Full-Stack Developer Built an enterprise GRC and security-audit platform implementing the OCTAVE Allegro methodology end-to-end. TypeScript + Vite SPA with dual cloud (Supabase auth + per-user RLS) and offline IndexedDB modes, strict typing, ESLint, Vitest, and a CI gate (typecheck, lint, test, build).	Jun 2026 - Present.
	AstraPay Naik Kelas - Alternative Credit Scoring , Full-Stack Developer Built an explainable alternative credit-scoring engine that converts QRIS transaction history into a transparent AstraScore and tiered micro-loans auto-repaid from sales. Next.js + TypeScript, validated by 20 unit and 21 edge-case tests across 5 personas. Built for AstraPay Hackathon 2026.	Jun 2026 - Present.

Built a developer progress-tracking platform (Next.js 16, Prisma, PostgreSQL/Supabase, Auth.js GitHub OAuth) with daily entries, a GitHub-style streak heatmap, an analytics dashboard, and shareable public profiles. CI-backed and deployed on Vercel.

SKILLS & CERTIFICATES	Skills: Software Development, Telecommunication and Networking.
	Certificates: Gemini Certified Faculty, (Google for Education), Gemini Certified Student, (Google for Education), Build an AI Agent, (IBM SkillsBuild), Team Essentials for Designing AI Solutions, (IBM SkillsBuild), Introduction to Large Language Models, (IBM SkillsBuild), Data Literacy, (IBM SkillsBuild), Sensemaking with Data, (IBM SkillsBuild), Memulai Pemrograman Dengan C, (Dicoding Indonesia), Memulai Pemrograman Dengan Java, (Dicoding Indonesia), Memulai Pemrograman dengan Haskell, (Dicoding Indonesia), Belajar Prinsip Pemrograman SOLID, (Dicoding Indonesia), Belajar Dasar Manajemen Proyek, (Dicoding Indonesia), Akselerasi Karier dan Produktivitas dengan Gemini, (Dicoding Indonesia), Intro to Software Engineering (Coding Camp), (RevoU), Intro to Data Analytics (Mini Course), (RevoU), Google Cybersecurity Professional Certificate, (Google (Coursera)), Getting Started with Git and GitHub, (IBM (Coursera)), Google IT Support Professional Certificate, (Google (Coursera)), Cyber Security (Online Event), (Dibimbing).
LANGUAGE PROFICIENCIES	English (Fluent)
PERSONAL	Motivated Informatics student (Cyber Security concentration) and a self-driven full-stack and AI developer who takes ideas from zero to shipped, tested products. Strong in problem-solving, fast independent learning, and end-to-end ownership - proven through self-built AI, security, and fintech products plus freelance and founder experience. Detail-oriented, adaptable, and driven to build technology that solves real-world problems.
