PROFESSIONAL SUMMARY

AI-focused Full-Stack Software Engineer and Founder with hands-on experience building production-grade applications across computer vision, real-time systems, fintech, and mobile. Proficient in TypeScript, Python, Kotlin, and modern AI APIs (Anthropic Claude, Gemini, YOLO11). Proven ability to architect and ship end-to-end products independently— from system design to deployment.

WORK EXPERIENCE

Founder & Full-Stack Developer — FounderIQ Jun 2026 – Present

- founderiq.vercel.app · AI-powered startup validation SaaS
- Designed and launched AI SaaS with 4 specialized tools: Idea Validator, Business Model Canvas, Pitch Crafter, and Market Intel— covering the full early-founder journey in one platform.
 - Engineered real-time streaming architecture using Vercel AI SDK + Anthropic Claude API, delivering structured AI output with progressive rendering and reduced perceived latency.
 - Built responsive full-stack app with Next.js 15, TypeScript, shadcn/ui, Framer Motion, and Zustand; deployed on Vercel with Husky + lint-staged CI quality gates.
 - Implemented dual AI-provider abstraction layer (Anthropic + OpenRouter) enabling runtime model switching and cost-flexible scaling.

FEATURED PROJECTS

PestGuard-AI Python · FastAPI · React · YOLO11 · Docker · WebSocket · Gemini AI

- Built real-time pest-detection system for PT Kawan Lama Group's AI Open Innovation Challenge 2026—custom-trained YOLO11 computer vision model monitoring 4 concurrent warehouse zones with sub-second WebSocket alerts.
- Integrated Telegram bot notifications, CLAHE low-light enhancement, and a Gemini-powered RAG chatbot; fully Dockerized. Projected Rp 144–324M/year in pest-control cost savings.

Obsidian TypeScript · TradingView Lightweight Charts · WebSocket · RBAC

- Built enterprise-grade crypto trading terminal with live OHLCV candlestick charts, 6+ technical indicators (RSI, MACD, Bollinger Bands), real-time alerts, and \$100k paper trading engine with average-cost P&L tracking.
- Implemented RBAC-gated admin dashboard with append-only security audit trail, server-side indicator computation, and a custom monochrome design system.

MiniBookLibrary Kotlin · MVVM · Room · Coroutines/Flow · Material 3 · Google Books API · JUnit

- Built native Android library app with MVVM + Repository architecture, Room (KSP) persistence, and Kotlin Coroutines/Flow; integrated Google Books API for ISBN auto-fill, with reading-status tracking, ratings, search, and PDF/JSON export.
- Engineered 51 unit tests (JUnit, MockK, Turbine) across auth, repositories, and API parsing; automated build/test/APK pipeline via GitHub Actions with Material 3 UI and swipe-to-delete undo.

AstraPay Naik Kelas Flutter · Dart · Provider · fl_chart · Material 3

- Built cross-platform Flutter app for an AstraPay fintech hackathon—an explainable alternative credit-scoring engine (AstraScore, 300–850) that weights QRIS cash flow, repayment history, and account tenure across 5 signals to size micro-merchant working-capital limits.
- Architected a clean layered codebase with Provider state and a swappable service layer mapped to AstraPay Sandbox APIs; implemented auto-split QRIS repayment, tiered loan pricing, a custom design system, and functional + widget tests.

EDUCATION

Bachelor of Informatics — President University 2024 – Present

6th Semester · Cikarang, West Java, Indonesia · Recipient, Jababeka Scholarship

CERTIFICATIONS

- Gemini Certified Faculty & Student — Google for Education, May 2026 (valid to 2029)
- Build an AI Agent — IBM SkillsBuild, May 2026
- Team Essentials for Designing AI Solutions — IBM SkillsBuild, May 2026
- Data Literacy — IBM SkillsBuild, May 2026
- Intelligent by Design: Build an AI Agent — IBM SkillsBuild, May 2026
- Intro to Software Engineering — RevoU, May 2026
- Intro to Data Analytics — RevoU, Sep 2024
- SOLID Principles · Java · C · Project Management — Dicoding, May 2026

LEADERSHIP & ACTIVITIES

Organizing Committee — Hacksphere Hackathon Oct 2025 · President University

48-hour hackathon · teams of 3 · open to high school, university, and industry participants

TECHNICAL SKILLS

- | | |
|---------------|---|
| Languages | TypeScript · JavaScript · Python · Dart · Java · Kotlin · C · Haskell |
| Frameworks | Next.js 15 · React 19 · FastAPI · Flutter · Android/Jetpack · Express.js · Tailwind CSS |
| AI / ML | Anthropic Claude API · Gemini API · YOLO11 · Vercel AI SDK · LLM Prompt Engineering |
| Tools & Infra | Docker · PostgreSQL · Prisma · Supabase · Vercel · GitHub Actions · ESLint · Vitest |
